

Committee: Western New York Chapter of Health-system Pharmacists
Topic: Health Information Exchanges
Sponsored: William Loeffler

Health Information Exchanges

Whereas, Access to the most accurate patient health information will aid health-system pharmacists' requirement to conduct a prospective drug review prior to a prescription being dispensed, and,

Whereas, Developing a method of an efficient past medical history and drug review will contribute to higher levels of patient safety by providing a more accurate and complete health record, and,

Whereas, Accessible health information will help improve communication amongst healthcare providers, improve the quality of the electronic health record, reduce cost burden of duplicate diagnostic tests and improve quality of healthcare, therefore, be it

Resolved That:

The New York State Council of Health-system Pharmacists supports the interfacing between regional/state health information exchanges with health-systems' electronic health records.
