new patients

of total patients actively in clinic

of visits

no show for visit

Medicaid / Medicare

Commercial insurance

Uninsured / indigent

tobacco-free 30 days

tobacco-free 90 days

tobacco free at 6 months

MTM Outcomes

Unnecessary Drug Treatment (Total)

1.No valid Medication Indication

2. Duplicative Therapy

3. Medication being used to treat an avoidable ADR

Need for Additional Treatment (Total)

1. Drug added for synergy

2. Untreated Indication (i.e. ACEI in CHF)

3. Preventative Treatment

Total Indication DRPs

Ineffective Drug (Total)

1. More effective drug available

2. Dosage form is in appropriate

Inadequate Dose (Total)

1. Dose too low

2. Needs additional drug monitoring

3. Dosing interval not frequent enough

4. Incorrect administration (dose too low)

Total Effectiveness DRPs

Adverse Drug Reaction identified (Total)

1. Unsafe drug for patient (includes drug/disease interaction, excessive dose)
2. Drug interaction

3. Incorrect administration (unsafe)

Excessive Dose (No ADR) (Total)

1. Dose too high
2. Needs additional monitoring
3. Frequency inappropriate (resulting in high dose)
4. Duration too long

Total Safety DRPs

Medication Errors (Total)

1. No med error / event, but potential for ADE identified
2. Med error/event DID NOT reach patient
3. Med error/event reached patient, but no harm
4. Med error/event reached patient, monitoring or intervention required to confirm no harm

Total Medication Errors

Nonadherence (Total)

1. Patient doesn't understand directions
2. Patient prefers not to take medication
3. Patient forgets to take medication

4. Drug is unavailable

5. Patients can't afford medication

6. Patient can't swallow/administer

Adherence problem resolved

Total Nonadherent

Cost Avoidance (Total identified)

Less expensive equivalent alternative

(estimated annual savings)

Alternative route (IV to PO) (estimated

annual savings)
