

## Student Program:

*“Essential Skills for a Pharmacy Student”*

There are many skills that we hope a pharmacy student obtains while in school. In addition to pharmaceutical knowledge, it's important to learn how to become a professional. With the increasing amount of students and tighter competition for internships, residencies and jobs, it is important to stand out. This program has been prepared to develop skills to help succeed on rotations, applying for a residency or in the job market. Whether it's networking, preparing yourself for an interview or simply having the ability to communicate properly, these additional skills will help refine you as a professional and give you the best chance for success.

A \$25 pre-registration fee is required to attend the program. Participants are not required to be a student.

To register on-line, visit [www.nyschp.org](http://www.nyschp.org)
